# 1. Introduction

SAVIOR is created as the main decentralized charity coin on the Ethereum blockchain. Savior Coin unlike other tokens and coins that you have met so far, does not have a program to solve complex equations, SAVIOR Charity Foundation was established with the aim of identifying and helping cancer patients in need of financial support around the globe.

# 2. Purpose

The main purpose of this project is to help needy cancer patients around the world. This charity is supposed to provide its financial resources from the profit from the sale and turnover of Savior Coin and investments related to cryptocurrency. Savior Charity Foundation is supposed to have representatives in different countries and they will help this charity foundation on a full-time basis to identify cancer patients in need. Identification of sick people in need is done through our representatives in different parts of the world as well as Twitter, Telegram, Instagram and other communication media of this token. After examining the expert team of the institute and making the necessary inquiries from the hospital and the doctor of the patient in question, financial assistance will be paid for the treatment of the said patient. Step-by-step reports of these activities are shared on the official website of SAVIOR Institute and other communication media.

# 3. Savior Coin Idea

As we all know, there are different types of cancer, one of the most common of which is lung cancer, and this type of cancer alone has about 87,000 deaths in the world every year, and this type of cancer has the highest death rate among men.

People suffering from cancer are increasing day by day, the graph below shows the statistics of Adolescents and Young Adults people affected by the type of cancer in a four-year period.

Adolescents and Young Adults (AYAs) with Cancer - NCI

## Savior Coin

**BUT NOW**, Considering all the problems that may arise along the way, the global charity team of Savior digital currency has created Savior Coin, which is the base currency of this charity, to help the treatment of cancer patients in need in a different activity than other digital currencies.

Savior's global team intends to financially support those dear patients or transfer them to advanced hospitals in other countries and treat them.

One of the important reasons for using cryptocurrency and the blockchain platform for this important activity is the easy transfer of cryptocurrency internationally, which don't requires going through a complex, long and expensive process for financial exchanges between different countries. Absolutely, this will be done according to the rules and regulations.

### 4. How To Fund and The Future of Savior Coin

1- The first source of income of Savior Charity is the sale of 75% of the dedicated currency tokens of this charity, namely Savior Coin.

2- The next plan of the charity team is to invest part of the income from the sale of Savior Coin and people's contributions in the field of Stack and DeFi and Investing in currencies such as Bitcoin, Ethereum, Binance Coin, Ripple and etc.

3- The team has a proposal for benefactors and investors who, if they wish, return part of the purchased crypto-currencies to the charity's main wallet to rejoin the circulating currencies, and this popular currency is sold by the team in the market and an income get new.

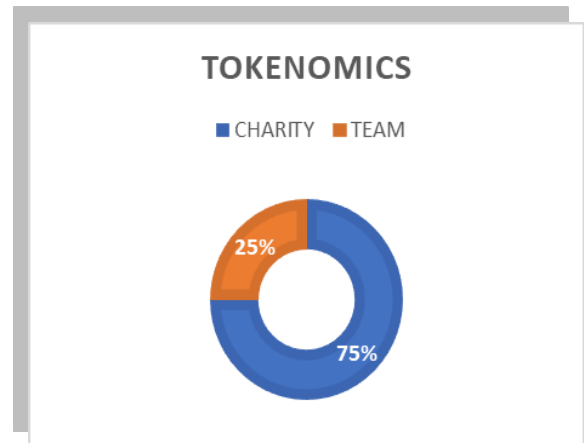

4- Companies, institutions, institutions and interested benefactors can also deposit their contributions in cash to the official bank account of the charity, which will be announced later on the main website of this charity.

5- If this charity is welcomed and supported by global organizations in the future, Savior Coin will be updated and a new token will be created to support more needy patients.

## 5. Tokenomics

No Taxes, No Bullshit. It's that simple. The total supply of Savior Coin is 8,000,000,066 SAVIORS, 25% of the tokens belong to the production team and the other 75% are for the establishment of the SAVIOR charity and the implementation of the project's big goals, which is to help special patients in need around the world

The information contained in this whitepaper is subject to change without notice and is not to be relied upon as a representation of future results or performance.

## 9. Learn More About Cancer!

*I have put brief information and statistics about the types of cancer and the difficult and expensive process of treating cancer patients at the end of the white paper, which is recommended to be read to understand the depth of the disaster.*

As we all know, there are different types of cancer, one of the most common of which is lung cancer, and this type of cancer alone has about 87,000 deaths annually in the world, and among men, it has the highest death rate among cancers in the United States. Leukemia is a group of types of cancer that usually starts in the bone marrow and causes the formation of a large number of abnormal white blood cells. These white blood cells are not fully formed and are called blasts or leukemia cells.

## Savior Coin

The main and real cause of most cancers is unknown; But cancer and oncology scientists and doctors believe that a combination of genetic, environmental, nutritional and weather factors play a major role in these diseases.

Cancers are usually treated with a combination of chemotherapy, radiation therapy, targeted therapy, bone marrow transplant, and palliative care. Some cancers are treated with watchful waiting.

After providing treatment costs and financial support, success in treatment also depends on the type of cancer and the age of the person.

Currently, the results of treatment have improved in developed countries, but still in countries that are not developed in terms of medicine and welfare, the death rate due to various cancers, including leukemia, is surprisingly high, and unfortunately, **due to the heavy medical and treatment costs, the number of Many of these patients die due to poverty and lack of financial resources.**

For example, the rate of recovery from leukemia in a developed country like the United States in a five-year period is about 57%, of which 60% to 75% in children under fifteen years old, which also depends on the type of leukemia. And in adult men and women, it is between 40% and 50%.

According to the above statistics, consider that in the third world and underdeveloped countries, which are weak in terms of medical expertise and treatment, the survival rate of these patients is less than 15%, and this is a great human disaster.

In another statistic extracted from medical articles in 2012 alone, blood cancer occurred in 352 thousand people all over the world and only 87 thousand of these dear patients were saved from death, mostly in developed countries such as America, Germany, England, Canada and France have been.

*Death rate due to cancer in 2017 Annual number of cancer deaths per 100,000 people*
